

# Monitoring transports reliably

## Smart. Intelligent. Cost-effective.

## ASPiON ■ G-Log 2

Shock and climate data logger

### Powerful sensor technology

- Precise 3-axis recording of shocks with up to  $\pm 24$  g per axis
- Shock/vibration test according to IEC 60721-3-2
- In addition, exact shock curve in milliseconds
- Lifetime factory-calibrated sensors
- Position visualization via gravitational force
- Logging of temperature and relative humidity
- Freely selectable threshold values

### Easy handling and sustainability

- Permanent memory for event recording
- Compact ABS housing IP 50, 35 grams, easy to mount
- Wireless data transfer via NFC and BLE
- Individually configurable, designed for universal use
- Long battery life with up to 1.5 years
- Replaceable battery, not subject to labelling
- Approved for air freight
- Excellent price-performance ratio

### PC software for Windows

- Wireless operation of the data loggers via BLE and NFC with USB card reader
- Numerous features: start/stop time-controlled, customizable profiles, shipment assignment, meaningful evaluations, multiple export formats and much more
- Multi-site operation with extensive possibilities for configuration and application
- High user-friendliness

### Smartphone apps for iOS and Android

- Wireless multi-readout via BLE even through packaging
- Analysis via traffic light function and in detail
- Sending of evaluations by e-mail or automatically via cloud transfer
- Tamper protection and easy operation

**Royalty-free PC software and app included**

**Excellent all-in-one solution for medium-sized businesses and global corporations**
